Page B. Pennell, MD

Dr. Page Pennell is Chair and Henry B. Higman Professor of Neurology at the University of Pittsburgh, USA. She is a clinician investigator with a focus on women's health in epilepsy. Her studies focus on the effects of hormones on seizure provocation, pharmacokinetic changes of anti-seizure medications (ASMs) with exogenous hormones or differing reproductive phases, and maternal and fetal outcomes during pregnancy in women with epilepsy. She is multi-Principal Investigator of the NIH- funded studies "Maternal Outcomes and Neurodevelopmental Effects of AEDs (MONEAD)", and "Physiological-based Pharmacokinetics Approach to Determine the Extent of ASMs during Pregnancy and Breastfeeding."

Dr. Pennell has served as President of the American Epilepsy Society and Chair of the Professional Advisory Board for the Epilepsy Foundation. She has been elected as an Ambassador for Epilepsy by the International League Against Epilepsy. She has over 150 peer-reviewed articles in the field. She has contributed over 15 book chapters and been guest editor of publications focusing on neurology illnesses and pregnancy.
