

HOW TO COMBINE CLINICAL AND RESEARCH CAREERS IN NEUROSCIENCE

The Association of University Professors of Neurology (AUPN) together with the National Institute of Neurological Disorders and Stroke (NINDS) and the American Neurological Association (ANA) welcome you to the fifth annual clinician-scientist mentoring symposium.

Goals: The goals of this symposium are to: 1) encourage medical students with neuroscience research training to pursue clinical training (with special emphasis on neurology) and choose clinician-scientist careers, 2) describe and discuss strategies for successfully melding clinical and research careers, 3) discuss the satisfactions and power of a combined research and clinical career, 4) describe and discuss sources of and strategies for obtaining training and research support, and 5) provide an opportunity for students to meet academicians who have successfully combined clinical and research careers in neuroscience.

Expectations: We are interested to know the impact of this symposium on the career-development experience of our student attendees. To this end we must collect both immediate and long-term information about our student participants. This information will help us justify federal support for future mentoring symposia and will allow us to modify the program to be maximally responsive to student needs. Please give us your feedback. We are counting on a 100% response rate to the brief questionnaires you will receive.

A handwritten signature in black ink, appearing to read "Bruce Ransom". The signature is fluid and cursive, with the first name "Bruce" being larger and more prominent than the last name "Ransom".

Bruce R. Ransom, M.D., Ph.D.
