

Dr. Alfred Frontera has over 40 years experience in the medical field. Dr. Frontera has spent most of his career running a Private Neurology Group of 10 physicians. He has extensive teaching experience with both residents and medical students with Mount Sinai, where he himself completed his residency. Dr. Frontera has held a variety of positions including Medical Director at The Kingston Hospital and Clinical Assistant Professor with Mount Sinai Hospital. Most recently, he served as the Chief of Neurology at Bay Pines VA.

Dr. Frontera holds a wide-range of professional appointments, including the New York State Board of Medicine, the IRPO Review, and the Olmstead Foundation. He is also a member of several professional societies, including the American Academy of Neurology and the New York State Neurological Society Board of Directors.

In partnership with the VA, UCF College of Medicine has identified individuals that provide a significant contribution to the college and medical students. Dr. Frontera joined the college in April of 2016 as part of this partnership. VA faculty members are invited to participate in teaching assignments, curriculum and admissions committees, student affairs and research mentorship. Their contributions make a significant impact for both the college and students.
