

Poncelet bio 2021

Ann Poncelet, MD, FAAN is Professor of Neurology at the University of California, San Francisco (UCSF). She specializes in the treatment of autoimmune neuromuscular disorders and brachial neuritis. She is the William G. Irwin Endowed Chair and Director of the Haile T Debas /UCSF Academy of Medical Educators. She directed the core neurology clerkship for medical students from 1997-2007 with a focus on bedside teaching and professionalism. She has won many medical student teaching awards including the Frank A. Rubino Award for Excellence in Clinical Neurology Teaching and American Neurologic Association Distinguished Teacher Award and held the Rowe Endowed Chair for Teaching in Neurology. She led a team to create the first longitudinal integrated clerkship (LIC) at an urban academic medical center (PISCES). She co-directed this program from 2007-2016 and initiated the creation of a similar program for UCSF medical students at Kaiser Permanente, Oakland which launched in 2011. In 2018, she helped create a unique UCSF medical school track in the agricultural San Joaquin Valley to address a significant workforce shortage. She has served as a consultant for the development of longitudinal clerkships for dozens of medical schools nationally and internationally. The design, implementation and evaluation of these LIC programs resulted in multiple publications with a focus on the impact of longitudinal relationships with patients and peers.
