

Dr. Eric Lawson is a Neurocritical Care Fellow at Emory Healthcare in Atlanta, Georgia. Dr. Lawson completed his medical degree at University of South Carolina School of Medicine Greenville before completing a residency in Neurology at Emory University School of Medicine. He served as Chief Resident in his 4th year of training. Dr. Lawson is an avid user of social media for medical education, he was the social media director for his residency program, helped to found the #HowToNeuroTwitter initiative, and continues to advocate for the use of social media as a tool in medical education, networking, and patient outreach. He currently serves as a social media ambassador for the Neurocritical Care Journal. Dr. Lawson's research interests include post-thrombectomy care and post-cardiac arrest neuroprognostication. Outside of work he enjoys spending time outdoors with his wife in addition to woodworking and refinishing furniture.
